

E Timer™

\$399.95
Made in USA

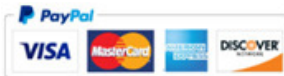

The **E-Timer** was developed for folks who enjoy driving their cars more than working on them trying to keep the ignition system functioning properly.

Simply replace the original Roller, Anderson, or New Day timer with the **E-Timer** and enjoy maintenance free operation with the sound and appearance of stock operation but with superior performance. The **E-Timer** eliminates the special knowledge, expensive HCCT tools and mechanical skills needed to install, align and maintain coil points. Simple battery operation eliminates all magneto variables and restrictions on ignition timing. There are no timer contacts to wear out, maintain or replace. The **E-Timer** is an ideal solution for mechanically sound but non-functioning magneto. Superior performance operating on 6V, 8V, 10V or 12V battery. Imagine never having to clean, adjust or replace coil points or timer ever again! Please visit our website or e-mail us for more information about the E-Timer.
